EXP series, with Ø30mm axle, extremely rigid, outstanding characteristics including Direct Drive, Super Aero, Super low Q-factor, guarantees remarkable performance gain at professional races, especially at triathlon, time trial where the biggest obstacle is air resistance.

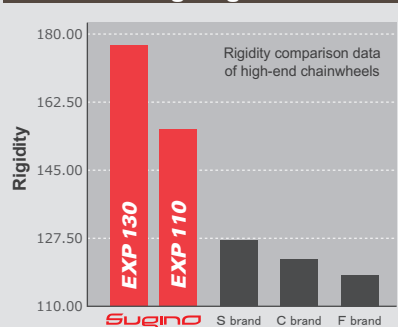

### Super Aero

The spider arms are invisible when viewed from the front of the bike, which maximizes aerodynamic effect.

### Direct Drive

As the spider arms are flat, and lie in the same plane as the chainring, the pedal power is directly transmitted to the drive.

### High-rigid

\*EXP crank uses PF30/BB30 standard.

\*EXP crank requires a dedicated B.B. noted above.
